New York, New York

[cocoons360.github.io/portfoliosite](https://cocoons360.github.io/portfoliosite)

Early-career developer and researcher with experience in user behavior research, AI prototyping, growth strategy, video games, and interactive systems.

## RECENT EXPERIENCE

### Video Game Designer and Developer, Birdsong — November 2025 - Present

- Developing a 12-20 hour 3D narrative-driven mystery adventure in Unity set in the early 2010s exploring themes of digital romanticism, nostalgia, and identity formation.
- Designing mechanics, investigation systems, and branching narrative paths that respond to player choices and environmental exploration.
- Conducting cultural and historical research into early 2010s aesthetics, collegiate life, and digital communication patterns to build an authentic period setting.
- Writing character dialogue for 8+ dynamic characters, environmental storytelling, and thematic content examining parasocial relationships and the intersection of online/offline identity.

### Product and Game Designer, BePresent — September - November 2025

- Designed three modular gamification systems for a screen time wellness app, using AI and user-generated prompts around rejection therapy, self-reflection, and collaborative goals.
- Built frameworks connecting individual progress to shared motivation, helping shape how users experience control and community with the product.
- Rapidly prototyped and iterated concepts in Figma and Cursor for clear executive review.

### Ethnographic Researcher and Growth Strategist, 222place — July - October 2025

- Conducted ethnographic research across 60+ live events, analyzing how user behavior diverged from product intent in an AI-native in-person social platform.
- Helped launch the platform in 4 global cities, managing 50+ creator partnerships and supporting expansion that doubled the platform's market footprint.
- Synthesized behavioral patterns, creator dynamics, and engagement signals into shared language for evaluating product and growth team decisions.

### 3D Design Researcher, Mila Perez / SoundSense — October 2024 - July 2025

- Contributed 3D design work and accessibility research for an audio-accessible speaker product.
- Supported education and workflow sharing around 3D modeling, texturing, and rendering tools.

## EDUCATION

B.A. in English, and Mandarin, Fordham University, New York, New York - Spring 2025

Relevant coursework: Video Game Culture, Theory & Practice · Digital Storytelling · Digital Ethnography

## SKILLS

- |                          |                    |                                  |
|--------------------------|--------------------|----------------------------------|
| • UX Research            | • Systems Thinking | • Technical Writing              |
| • Ethnographic Research  | • Figma            | • Stakeholder Communication      |
| • User Behavior Analysis | • Unity            | • Cross-Functional Collaboration |
| • Interaction Design     | • Blender          | • Cursor                         |
| • Rapid Prototyping      | • Photoshop        | • Model Context Protocol tools   |
| • Growth Strategy        | • Photogrammetry   | • Mandarin (Conversational)      |
